### Report Overview

Polyimide film is a monorphic polymer and an advanced polymer material. Because it has a very strong molecular structure, its performance is extremely high among many polymers. Very strong, excellent heat resistance, and excellent electrical insulation. In addition, as organic matter has a low rate of expansion relative to heat, even when used at high temperature, the dimension error caused by expansion can be prevented. It is a film that is often used for temporary use in high temperature, such as masking of a packaging substrate.
