## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Polyimide Synthesis Monomer ODPA competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. ODPA is a widely used monomer for synthesizing polyimides, offering excellent thermal stability, chemical resistance, and electrical insulation properties. The ether linkage in its molecular structure imparts enhanced flexibility and processability to polyimide materials, making them suitable for high-performance films, molded plastics, electronic devices, and energy applications.
