## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Polyisoprene Condoms competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Polyisoprene condoms are a type of high-end condoms made with synthetic polyisoprene as the main raw material. Their chemical structure is highly similar to natural rubber latex (NR Latex), but they do not contain the protein found in natural latex. Therefore, they can effectively avoid type I allergic reactions in people who are allergic to natural latex. In 2024, global Polyisoprene Condoms production reached approximately 1.6 Billions units, with an average global market price of around US\$ 0.5-1 per unit.

The global Polyisoprene Condoms market size was estimated at USD 1124.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 12.40% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Polyisoprene Condoms market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
