Abstracts

Polyphenylene Sulfide Fibers (PPS) are high-performance, semi-crystalline fibers with exceptional chemical and heat resistance, high dimensional stability, low moisture absorption, and high resistance to hydrolysis when exposed to acids, alkal, and organic (corrosive) solvents. Polyphenylene Sulfide Fibers (PPS) is a special engineering plastic with excellent comprehensive performance. PPS has excellent high temperature resistance, corrosion resistance, radiation resistance, flame retardancy, balanced physical and mechanical properties and dimensional stability, as well as excellent electrical properties. It is widely used as a structural polymer material and is widely used as a special engineering plastic after filling and modification. At the same time, it can also be made into various functional films, coatings and composite materials, and has been successfully applied in the fields of electronics, aerospace, automobile transportation, etc. As various industries pay attention to lightweight materials, PPS fiber is favored for its lightweight properties, especially in the automotive and aviation fields, for improving fuel efficiency and reducing emissions. The rapid development of polyphenylene sulfide (PPS) fiber is mainly concentrated in Asia Pacific (China, Japan), North America and Europe. China is the main production and consumption market of polyphenylene sulfide fiber. With the increasing demand for high-performance materials, especially in the automotive, electronics and aerospace industries, related industries are developing rapidly. Japan also has a leading advantage in the research and development and production of high-performance materials, and polyphenylene sulfide fiber is widely used in the electronics and machinery industries. Countries such as Germany, France and the United Kingdom also occupy an important position in the high-performance fiber market, promoting the application of polyphenylene sulfide fiber in electronics, automobiles and medical fields. With the development of economic globalization, the demand for PPS fiber is growing rapidly in emerging markets (such as China, India, etc.), which provides new opportunities for the market.

The global Polyphenylene Sulfide Fibers market size was estimated at USD 301.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.80% during the forecast period.
