Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Polyurea-Based Greases competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global polyurea-based grease production reached approximately 1.42 million metric tons, with an average global market price of around US\$ 4,250 per metric ton. Polyurea-based greases are high-performance lubricants thickened with polyurea compounds, offering excellent oxidation stability, high-temperature performance, and extended service life.
