Abstracts

Polyvinyl Alcohol Eye Drops are sterile, over-the-counter ophthalmic solutions primarily used as artificial tears to relieve dryness and irritation of the eyes by lubricating the ocular surface and stabilizing the tear film. The active ingredient, polyvinyl alcohol, is a water-soluble synthetic polymer that mimics the viscosity and moisturizing properties of natural tears, providing temporary relief from symptoms associated with dry eye syndrome, environmental factors, or prolonged screen use. These drops are typically preservative-free in single-dose vials or formulated with mild preservatives in multi-dose bottles to ensure safety and reduce the risk of irritation, making them suitable for individuals with sensitive eyes or those requiring frequent application.
