Report Overview

Global polyvinyl chloride (PVC) membranes market is expected to grow over the forecast period on account of its increasing applications in emerging economies including Brazil, India and China. PVC membranes are used in a wide range of applications such as construction & building, packaging & transportation, electronics & electrical and automotive & aerospace industries. Expansion of the global construction & building industry owing to surging infrastructure expenditure is expected to drive PVC membranes market over the next seven years mainly in India and China. PVC membranes are expensive and presence of stringent regulations in the developed economies of European Union and North America is expected to be a potential factor for hampering market demand over the forecast period. In addition, increasing crude oil prices are expected to hinder the PVC membranes market over the forecast period as PVC is derived from ethanol. Emergence of bio-based PVC membranes which have a recycling capacity up to seven times and have a lifespan over one hundred and forty five years is expected to open new opportunities for PVC membranes market growth over the forecast period.
