Abstracts

Port refrigerated storage yards are designated storage areas within port areas for refrigerated or frozen containers used to store temperature-sensitive goods, such as fresh produce, pharmaceuticals, and chemicals. These yards are equipped with electrical reefer points to maintain a constant temperature within the reefers and feature real-time temperature monitoring systems, emergency power supplies, and temperature alarm mechanisms. Their primary functions include temporarily storing refrigerated containers, ensuring the temperature safety of goods during their stay at the port, and supporting the connection and transshipment of cold chain logistics. Port cold storage yards are an essential component of the cold chain logistics system, playing a key role in global fresh produce trade, vaccine transportation, and cross-border e-commerce. The upstream and downstream supply chain system of port refrigerated storage yards covers multiple key links: the upstream is composed of refrigerated container manufacturers (such as CIMC and Maersk), refrigeration equipment manufacturers (such as Carrier and Daikin), power system suppliers (such as ABB), and port infrastructure developers (such as China Communications Construction Group and Bechtel), who jointly provide the hardware and technical support required by the yards; the downstream is connected to cold chain logistics service providers (such as Lineage, JD Cold Chain, and SF Express Cold Transport), food processing companies (such as Tyson, Nestlé, and Danone), pharmaceutical companies (such as Pfizer, Moderna, and Sinopharm Group), and cross-border e-commerce platforms (such as Alibaba, Amazon Fresh, and Pinduoduo). These customers rely on the yards to ensure the safety and efficiency of their temperature-controlled goods at the port, realizing closed-loop coordination of global cold chain transportation.

The global Port Refrigerated Storage Yards market size was estimated at USD 3030.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

6.10% during the forecast period.
