## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Portable Biphasic Defibrillator Monitors competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of Portable Biphasic Defibrillator Monitors reached approximately 320,000 units, with an average market price of about USD 2,522 per unit, an annual production capacity of roughly 400,000 units, and an industry-average gross margin of approximately 28%. A Portable biphasic defibrillator monitor integrates a biphasic waveform defibrillator with vital-sign monitoring functions, widely used in hospital emergency rooms, intensive care units, operating theatres and ambulance services. Compared to traditional monophasic devices, the biphasic waveform provides more efficient cardiac rhythm restoration and reduces myocardial trauma. Typical equipment features ECG monitoring, SpO<sub>2</sub>, NIBP, temperature sensors, defibrillation paddles or pads, display screens and alarms. In the supply chain, the upstream includes semiconductor chips, power modules, biosensors, display panels and plastic/metal housing components; the downstream is comprised of hospitals (ICU, emergency departments), EMS vehicles, monitoring centers and rental service providers. The cost structure consists of roughly 52% raw materials/parts cost, 15% R&D and testing, 18% labor and manufacturing overhead, with the remainder for packaging, logistics and after-sales service. On consumption at the downstream end, assuming each mid-to-large hospital uses 2-4 units and each ambulance one unit, with about 50,000 hospitals and 100,000 ambulances globally, the annual replacement and new-purchase demand is estimated between 40,000 and 60,000 units.

The global Portable Biphasic Defibrillator Monitors market size was estimated at USD 807.0 million in 2025 and is projected to grow at a compound annual growth rate

(CAGR) of 4.10% during the forecast period.
