### Report Overview

Portable or compact, ultrasound diagnostic devices can be broadly split into three categories. First, there is a laptop, often brought to a patient's bedside. Like almost all laptops, they weigh between 10 and 14 pounds. Secondly, there are hand-carried systems, weighing between five and eight pounds. This is where Sonosite carved itself an effective niche with, for example, the Sonosite Edge. These systems can be taken out as necessary. Third, are the handheld or hand-operated systems that weigh less than a pound. They can accompany the physician anywhere.
