## Abstracts

Portable GTAW Machine is a small, lightweight, and easy to carry welding equipment. Tungsten inert gas welding uses argon gas as the protective gas and tungsten electrode as the non melting electrode. With the help of the arc generated between the tungsten electrode and the workpiece, the base material is heated and melted (while the welding wire is also melted) to achieve welding. Argon gas is used to protect the weld metal and tungsten electrode melt pool from air oxidation in the arc heating zone.

The global Portable GTAW Machine market size was estimated at USD 565.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.30% during the forecast period.
