### Report Overview

The portable light tent is a compact, collapsible photography accessory designed to create a controlled lighting environment for shooting small to medium-sized products. Typically constructed with a foldable frame and diffused fabric panels, it minimizes shadows and enhances lighting uniformity by scattering light from external sources (e.g., LED panels or natural light). Key features include portability (often with carrying cases), adjustable backdrops (white, black, or colored), and compatibility with smartphones or DSLRs. It caters to e-commerce sellers, content creators, and hobbyists seeking professional-quality product imagery without studio setups. The market emphasizes affordability, ease of use, and space efficiency, with variations in size (20cm?1m), material durability, and additional functionalities like built-in LED lighting or modular expandability.
