Report Overview

A portable ozone concentration detector is an instrument that can be carried with you for detecting ozone concentration. It is small, lightweight and easy to carry and can be clipped to a belt, shirt pocket or helmet. This detector can detect the concentration of ozone gas exposed to extreme environments. If the concentration of ozone gas in the air is too high, it will send out a triple alarm signal of sound and light vibration at the first time, thus effectively preventing the occurrence of ozone gas in the air. Excessive concentration may lead to poisoning accidents.
