Abstracts

A portable spray humidifier is a compact, often battery-powered or USB-rechargeable device designed to emit a fine mist of water vapor into the immediate surrounding air, increasing local humidity levels for personal comfort, skincare, or respiratory relief. These devices typically feature lightweight, ergonomic designs suitable for on-the-go use, such as in offices, cars, or during travel, and may include functionalities like adjustable mist settings, optional essential oil diffusion, or silent operation. Unlike larger, stationary humidifiers intended for room-wide coverage, portable spray humidifiers prioritize convenience, portability, and targeted micro-climate control, making them ideal for individual users seeking quick hydration benefits in dry environments.
