A portable welding fume extractor is a device that removes and filters harmful fumes and smoke produced during welding operations. These fumes contain various hazardous substances, including metal oxides, carcinogens, and respiratory irritants, which can pose serious health risks to welders and others exposed to them. The global portable welding fume extractor market growth is being driven by several factors, including:

- Increased demand for welding fume control:** As awareness of the health hazards associated with welding fumes grows, there is an increasing demand for effective fume control solutions. Portable welding fume extractors offer a convenient and cost-effective way to control fumes at the source.
- Stricter occupational safety and health regulations:** Governments around the world are implementing stricter regulations to limit welding fume exposure in the workplace. This is driving the adoption of portable welding fume extractors to comply with these regulations and protect workers' health.
- Advances in technology:** Technological advancements in filtration systems, fan performance, and extractor design are improving the efficiency, portability, and effectiveness of portable welding fume extractors. This is making them more attractive to businesses seeking to improve worker safety and comply with regulations.
- Expanding applications:** The use of portable welding fume extractors is expanding beyond traditional welding applications to include metalworking, laser engraving, and other industrial processes that generate hazardous fumes. This is increasing the market potential for these devices.
- Rising demand in developing regions:** The demand for portable welding fume extractors is growing rapidly in developing regions, particularly in Asia Pacific and Latin America, due to the expansion of manufacturing industries and the adoption of stricter safety standards.

The global Portable Welding Fume Extractor market size was estimated at USD 502.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of
