## Abstracts

A railroad sleeper is rectangular block of support used in the railways for rail tracks. Railroad ties are beneficial in transferring the load to the rail track ballast while holding the tracks intact. Recycled Plastic Sleeper is produced from recycled materials such as plastic and rubber, which makes it environment-friendly. Recycled Plastic Sleeper has proven to outperform traditional tie materials due to its properties such as resistant to several weather conditions and anti-corrosive. A Recycled Plastic Sleeper does not crumble or decompose over time. Recycled Plastic Sleeper is also moisture-resistant and immune towards infestation by insects. The post-consumer recycled plastic sleeper market is a relatively new and rapidly developing market. Global market leaders include Lankhorst Mouldings, Voestalpine, TieTek, IntegriCo Composites, etc. The global recycled plastic sleeper market is mainly distributed in North America, Europe, Asia and other regions. Among them, the North American and European markets are relatively mature, and the Asian market, especially the Chinese market, is growing rapidly. With the continuous advancement of global infrastructure construction and the continuous improvement of rail transit systems, the demand for sleepers will continue to increase. At the same time, the improvement of environmental awareness and the promotion of policies will promote the further development of the post-consumer recycled plastic sleeper market.
