Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Povidone-iodine Disinfectant Wipes competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of povidone-iodine disinfectant wipes reached 18.5 billion units, with an average selling price of US\$0.018 per unit. Povidone-iodine disinfectant wipes are single-piece medical disinfectant products made with a non-woven fabric base and impregnated with a 7%-10% povidone-iodine solution (0.5% effective iodine). They are suitable for rapid sterilization of skin, wounds, and before medical procedures. Current global production capacity is approximately 23 billion units per year, with an average gross profit margin of approximately 24%-32%. Upstream raw materials mainly include medical non-woven fabric (approximately 45% of the material cost per unit), povidone (PVP, approximately 30%), iodine raw materials (approximately 10%), and packaging materials (approximately 15%). Downstream users mainly include hospitals, clinics, emergency kit manufacturers, pharmacies, e-commerce channels, and home care brands. In typical downstream consumption, hospitals consume an average of 50,000-300,000 units per month, home use accounts for approximately 38% of global demand, medical institutions account for 52%, and outdoor emergency and industrial applications account for 10%. Future demand growth will primarily come from improved hospital infection control standards, increased penetration of home first-aid kits, demand for public health emergency reserves, and the expansion of primary healthcare in developing countries. Business opportunities are concentrated in areas such as the construction of automated high-speed packaging lines, biodegradable nonwoven fabric alternatives, low-irritant formulas, integrated supply of medical wipes, and ODM export growth. Upstream PVP and medical nonwoven fabrics remain the core factors influencing cost fluctuations.

The global Povidone-iodine Disinfectant Wipes market size was estimated at USD 334.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.40% during the forecast period.
