Report Overview

Soft magnetic alloy powder metallurgy is used primarily for their magnetic response characteristics in DC magnetic fields. Post-sinter annealing normally is not required for the soft-magnetic alloys. Soft magnetic alloys are materials that can be easily magnetized , - thus exhibiting high permeability -high permeability allows the design of smaller, more efficient components,and just as easily demagnetized.Soft magnetic materials possess high flux density and permeability. Using iron with various alloying elements makes customized magnetic performance possible.
