Abstracts

Powdered bakery enzymes are specialized protein-based ingredients derived from microbial, plant, or animal sources, processed into a dry, free-flowing powder form to enhance dough handling, texture, shelf life, and overall quality in baked goods such as bread, cakes, and pastries. These enzymes function by catalyzing specific biochemical reactions?such as breaking down starches into sugars, strengthening gluten networks, or delaying staling?without being consumed in the process, offering bakers a natural, label-friendly alternative to chemical additives while improving consistency and efficiency in production.
