## Abstracts

Power Distribution Equipment Rental refers to the process of renting out equipment used for power distribution, including transformers, switchgear, cables, and other related equipment. This type of rental service is typically provided by companies that specialize in providing temporary or permanent power solutions for various industries and events. The equipment is designed to distribute electricity safely and efficiently to ensure reliable power supply. By renting such equipment, businesses and organizations can avoid the cost of purchasing and maintaining their own power distribution infrastructure, and instead, focus on their core operations. Moreover, rental services provide flexibility as they can be customized to meet the specific needs of the client, ensuring that the power distribution system operates efficiently and effectively. The upstream of power distribution equipment leasing is equipment manufacturing and resource supply (manufacturers of core equipment such as distribution transformers, high-voltage switches, cables, and suppliers of raw materials such as copper and silicon steel sheets), represented by ABB, Siemens, Schneider Electric, TBEA, Chint Electric, Baowu Steel, Jiangxi Copper, etc.; the midstream is leasing services and operations (professional power distribution equipment leasing companies, financial leasing platforms, equipment management service providers); the downstream is terminal application scenarios (industrial enterprises, commercial complexes, data centers, new energy power stations, rail transit, municipal infrastructure and other electricity demanders), covering multiple scenarios such as manufacturing upgrades, new energy consumption, urban renewal, and emergency power supply. Typical users include Tesla's Shanghai Super Factory, Alibaba Cloud Data Center, Beijing-Shanghai High-Speed Railway Traction Substation, Shenzhen Qianhai Free Trade Zone Smart Grid Project, etc.

The global Power Distribution Equipment Rental market size was estimated at USD

1205.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.70% during the forecast period.
