Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Power Inductors competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. An inductor, also called a coil/choke/ reactor, is a passive two-terminal electrical component that stores energy in a magnetic field when electric current flows through it. Inductor can be subdivided into radio frequency inductors and power inductors. RF Inductors is the inductors for high-frequency circuits are used in the high-frequency band from 10 MHz to several GHz. As these products require a high Q (Quality factor) value, most have a non-magnetic core structure, and they are mainly used in the high-frequency circuits of mobile communications equipment, such as mobile phones, wireless LAN, and others. Power inductors are solid state electronic component that receives and stores electrical energy utilizing a magnetic field. This field is typically created with tightly coiled conductive wire such as copper. Power inductors can be subdivided into integrated power inductors and non-integrated power inductors. At present, non-integrated power inductors occupy the main market share, but the share of integrated power inductors is gradually increasing. Global 5 largest manufacturers of Power Inductors are TDK, Murata, YAGEO, Delta Electronics and Taiyo Yuden, which make up over 55%. Among them, TDK is the leader with about 17% market share. China is the largest market, with a share over 50%, followed by Japan and North America, with the share about 17% and 6%. In terms of product type, SMD occupies the largest share of the total market, about 94%. And in terms of application, the largest application is Telecom/Datacom, followed by Industrial Use.

The global Power Inductors market size was estimated at USD 4678.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.90% during the

forecast period.
