Power Pressure Jet Washer is an electric power washer that is a high-pressure mechanical jet used to remove loose paint, mold, grime, dust, mud, and dirt from surfaces and objects such as buildings, vehicles and concrete surfaces. The volume of a pressure washer is expressed in gallons or liters per minute, often designed into the pump and not variable. The pressure, expressed in pounds per square inch, pascals, or bar (deprecated but in common usage), is designed into the pump but can be varied by adjusting the unloader valve. Rapid urbanization coupled with rising awareness of hygiene and hygiene among the general public is one of the key factors driving the growth of the market. Furthermore, the rise of professional cleaning startups across the globe is also driving the growth of the market.
