Abstracts

Pre-coated metal sheet, also known as coil-coated or pre-painted metal, refers to a continuous industrial process where metal coils—typically steel or aluminum—are cleaned, chemically treated, primed, and coated with one or more layers of paint or protective film before being fabricated into end products; this method offers superior consistency, durability, and efficiency compared to post-forming painting, as the coating is uniformly applied under controlled factory conditions, resulting in enhanced corrosion resistance, color retention, and aesthetic quality for applications across construction, automotive, appliances, and packaging industries.

The global Pre Coated Metal Sheet market size was estimated at USD 42350.25 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 5.45% during the forecast period.
