## Abstracts

Pre-Coated Screws are screws treated with specialized coatings, such as lubricants, adhesives, or anti-corrosion materials, applied during manufacturing to enhance their functionality and performance. These coatings reduce friction for easier installation, prevent loosening due to vibrations, provide sealing properties to protect against leaks, and increase resistance to wear and corrosion in harsh environments. Widely used in industries like automotive, electronics, construction, and aerospace, pre-coated screws streamline assembly processes by eliminating the need for separate treatments, ensuring reliable, consistent performance in critical applications.

The global Pre-Coated Screws market size was estimated at USD 467.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.30% during the forecast period.
