Report Overview

A rubber additive pre-dispersion or masterbatch for a rubber formulation consists of a mixture of rubber and one or more additives, such as rubber chemicals or carbon black, Insoluble Sulfur, present in high concentrations. The rubber additive pre-dispersion can be suitable for different rubber additives and is high in compatibility with different rubber products; components of the rubber additive pre-dispersion do not influence the vulcanization characteristics of ingredients and the physical properties of the products. Global key manufacturers of pre-dispersed additives include Lanxess, Shandong Yanggu Huatai Chemical, Atman CO., LTD etc. The top 3 companies hold a share about 30%. Asia-Pacific is the largest market, with a share about 69%, followed by Europe and North America with the share about 19% and 9%. In terms of product, EPDM-based type is the largest segment, with a share over 71%. And in terms of application, the largest application is tires, followed by automobile rubber products and rubber shoes.
