Abstracts

Pre-painted steel coil refers to a high-performance coated steel product manufactured through a continuous coil coating process, where a metallic substrate—typically cold-rolled, galvanized, or galvalume steel—is cleaned, chemically treated, primed, and finished with one or more layers of paint or protective coating, which is then cured under controlled heat to form a durable, uniform, and aesthetically versatile material used extensively in construction, automotive components, appliances, and industrial applications due to its corrosion resistance, color consistency, formability, and reduced on-site painting requirements.
