The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Prefabricated Steel Silos competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Prefabricated Steel Silos production reached approximately 5638 units, with an average global market price of around K US\$ 43.2 per unit. A prefabricated steel silo is a cylindrical storage structure constructed from pre-rolled galvanized or color-coated steel plates that are assembled on-site using high-strength bolts. Its core characteristics are modular design, factory production, and on-site assembly. Each steel plate is pre-punched with overlapping holes and sealed with gaskets, then firmly joined with special bolts to form a robust and airtight wall.
