Abstracts

The Prestige Cervical Disc is a medical device designed to replace a damaged or degenerated cervical intervertebral disc in the spine, specifically intended for use in cervical disc arthroplasty procedures. It is typically composed of a metal-on-metal construct, often utilizing materials like stainless steel or cobalt-chromium alloys, and features a ball-and-trough design that aims to mimic the natural motion and biomechanics of a healthy cervical disc. Approved by regulatory bodies such as the FDA, the device is indicated for patients suffering from symptomatic cervical disc disease, offering an alternative to traditional spinal fusion by preserving segmental mobility, reducing adjacent segment stress, and potentially improving long-term clinical outcomes.

The global Prestige Cervical Disc market size was estimated at USD 520.75 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 5.20% during the forecast period.
