The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Propofol Drug competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global propofol drug production reached approximately 376 million units, with an average global market price of around US\$ 3.7 per unit. Propofol drug is a short-acting, intravenous anesthetic agent used for the induction and maintenance of general anesthesia, sedation for mechanically ventilated adults, and procedural sedation. Propofol has the advantages of fast onset of anesthesia induction, rapid awakening, perfect functional recovery, and low incidence of adverse reactions such as postoperative nausea and vomiting. Its gross profit margin generally ranges from 50% to 80%. **Increasing Demand:** The demand for propofol is increasing, driven by the rising incidence of chronic diseases, surgeries, and medical procedures. The aging population, changing lifestyles, and growing healthcare infrastructure in emerging markets are also contributing to the increasing demand for propofol. **Technological Advancements:** Advances in drug delivery systems and monitoring technologies are enhancing the use of propofol. Innovations such as target-controlled infusion (TCI) systems allow for more precise administration, improving safety and efficacy. **Expanding Applications:** Beyond traditional surgical and diagnostic procedures, propofol's applications are expanding into areas such as pediatric anesthesia, veterinary medicine, and even in treating certain psychiatric disorders like refractory depression through off-label use. **Intensified Competition:** Competition among manufacturers will intensify further in the coming years. In addition, propofol substitutes will try to occupy more market share.

The global Propofol Drug market size was estimated at USD 1400.0 million in 2025 and

is projected to grow at a compound annual growth rate (CAGR) of 3.60% during the forecast period.
