Report Overview

Propolis extract is a natural resinous substance collected by honeybees from tree buds, sap flows, and other botanical sources, which is then mixed with beeswax and enzymes to create a protective compound for hives. Rich in flavonoids, phenolic acids, and other bioactive compounds, it is widely used in dietary supplements, cosmetics, pharmaceuticals, and functional foods due to its antimicrobial, anti-inflammatory, and antioxidant properties. The market for propolis extract is driven by increasing consumer demand for natural health products, growing awareness of its immune-boosting benefits, and its applications in skincare and wound healing. Asia-Pacific dominates production and consumption, particularly in countries like China, Brazil, and South Korea, where traditional medicine integrates propolis extensively. However, challenges such as supply chain inconsistencies, quality variations, and regulatory hurdles in some regions may impact market growth. The rise of e-commerce and clean-label trends further propels demand, positioning propolis extract as a high-growth segment in the nutraceutical and personal care industries.

The global Propolis Extract market size was estimated at USD 300.58 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 7.50% during the forecast period.
