In 2024, global Protection Films for Deep Drawing sales reached approximately 760,000 k Sqm, with an average global market price of around US\$ 1.65 per Sqm. Protection Films for Deep Drawing are temporary surface protection materials for metal stamping processes, adhering to sheet metal via pressure-sensitive adhesives to prevent tool scratches and oxidation during forming. These multi-layer films combine puncture-resistant PE substrates, cushioning interlayers, and controlled-tack acrylic adhesives, maintaining complete coverage under extreme stretching. Their stress-relief design accommodates severe metal deformation during deep drawing without film rupture. In automotive panels, appliance housings, and precision hardware manufacturing, these films significantly reduce defect rates and post-polishing needs, serving as essential auxiliaries for premium metal products. Compliance with ROHS and heavy metal standards ensures compatibility with subsequent coating processes.

The global Protection Films for Deep Drawing market size was estimated at USD 1254.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.70% during the forecast period.
