## Abstracts

PU and PE (Polyurethane and Polyethylene) paint coatings for furniture are protective and decorative finishes that combine the durability and flexibility of polyurethane with the chemical resistance and toughness of polyethylene. These coatings are commonly used in the furniture industry to provide a strong, protective layer that resists damage from environmental factors such as moisture, UV rays, and wear. PU coatings offer a high level of gloss and smoothness, while PE coatings are known for their excellent chemical resistance and ability to maintain a tough, long-lasting finish. Together, these coatings provide a superior combination of aesthetic appeal, durability, and protection, making them ideal for furniture exposed to heavy use, such as office furniture, kitchen furniture, and outdoor furniture. The application of PU and PE coatings helps ensure that the furniture retains its aesthetic appeal over time, while also protecting the wood from scratches, stains, and fading.
