Abstracts

The pulse pleated filter cartridge dust collector is a highly efficient industrial dust removal equipment. It is widely used in the purification and dust removal of dusty gases by combining pulse jet cleaning technology with pleated filter cartridges. Its core principle is to pass air through the pleated filter cartridge, use the large filtering space on the surface of the filter cartridge to capture dust particles, and then clean the filter cartridge through regular high-pressure pulse jet airflow to ensure the high-efficiency filtering performance and long-term stable operation of the filter cartridge. This type of dust collector has the characteristics of small size, large air volume, and good cleaning effect. It is suitable for dust control in metallurgy, chemical industry, cement, power and other industries.
