## Abstracts

Pulvis Fellis Suis, also known as porcine gallbladder powder, is a natural substance derived from the gallbladder of pigs. It is prepared by drying and grinding the gallbladder, resulting in a fine powder. Pulvis Fellis Suis has been used in traditional Chinese medicine and homeopathy for its potential therapeutic properties. It is believed to possess anti-inflammatory and detoxifying effects. In traditional usage, it has been recommended for conditions such as liver disorders, jaundice, digestive issues, and skin conditions. However, scientific research and clinical evidence supporting its efficacy and safety are limited, and its usage remains controversial. The industry trend of Pulvis Fellis Suis is relatively niche and limited. While it has historical usage in traditional medicine systems, particularly in traditional Chinese medicine and homeopathy, its popularity and acceptance in mainstream healthcare practices are low. The lack of substantial scientific evidence and clinical studies supporting its efficacy and safety restricts its broader use. In modern medicine, there is a growing emphasis on evidence-based practices and well-established therapies. Consequently, the industry trend for Pulvis Fellis Suis is restricted primarily to niche markets comprising individuals who prefer alternative and complementary medicine approaches. The product faces challenges in gaining wider recognition and acceptance within the healthcare industry.

The global Pulvis Fellis Suis market size was estimated at USD 99.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.90% during the forecast period.
