Abstracts

A push type magnetic sweeper is an industrial or commercial cleaning device designed to efficiently collect ferrous debris such as nails, screws, metal shavings, and staples from floors and other flat surfaces. It consists of a wheeled frame with a handle for pushing, housing a powerful magnet—either permanent or electromagnetic—positioned close to the ground to attract and retain metallic particles as the unit is moved. These tools are widely used in manufacturing facilities, construction sites, warehouses, auto repair shops, and other environments where metal contamination poses safety hazards or operational inefficiencies. Their effectiveness depends on factors like magnetic strength, sweeping width, maneuverability, and ease of debris removal, with variations available for light-duty applications or heavy-industrial use.

The global Push Type Magnetic Sweeper market size was estimated at USD 45.25 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.85% during the forecast period.
