Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on PVC Grid Pipe competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. PVC grid pipe is a porous communication pipeline with a smooth outer wall and a regular "I" - shaped grid structure on the inner wall. The core design is to divide a large internal cavity into multiple independent sub channels. PVC grating pipe, as a porous rectangular plastic pipe, is usually used for laying and other engineering projects. The specifications and product types of PVC grid pipes include three hole grid pipes, four hole grid pipes, five hole grid pipes, six hole grid pipes, and nine hole grid pipes. In 2024, global PVC Grid Pipe production reached approximately 395 K MT, with an average global market price of around US\$ 1319 per MT. The annual production capacity of a single production line is approximately 2000-5000 tons. The gross profit margin is between 10% and 25%. Upstream core raw materials: PVC resin: the most important cost item. Its price is closely related to international crude oil prices and supply and demand relationships, with significant fluctuations. Calcium carbonate: a commonly used filler used to reduce costs and improve certain properties. Stabilizers, lubricants, plasticizers and other additives: ensure the stability and product performance during PVC processing. Downstream customers: Communication operators: China Mobile, China Telecom, China Unicom, and their subsidiaries in various regions. Communication engineering contractor: a unit entrusted by the operator to be responsible for specific construction. Government led communication infrastructure projects, such as "smart cities" and industrial park pipeline construction.

The global PVC Grid Pipe market size was estimated at USD 521.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.40% during the

forecast period.
