Abstracts

PVC-U water supply pipe is a water supply pipe made of unplasticized polyvinyl chloride as the main raw material. It has excellent corrosion resistance, aging resistance and smooth inner wall surface, which helps to maintain water hygiene. This pipe does not add plasticizers during the manufacturing process, which ensures the rigidity and mechanical strength of the pipe, while making installation more convenient, light weight and low maintenance costs. Fusion connection or mechanical connection is often used to form a stable pipe network system.
