Abstracts

Pvoh (polyvinyl alcohol) water soluble film is a synthetic polymer-based material designed to dissolve completely in water, typically within specific temperature ranges and timeframes depending on its formulation and intended application. It is characterized by its biodegradability, non-toxicity, and excellent barrier properties against gases and oils, making it suitable for packaging products like detergent pods, agrochemicals, dyes, and pharmaceuticals, where controlled release, safety, and reduced environmental impact are priorities. The film's solubility can be engineered to activate in cold, warm, or hot water, allowing customization for diverse industrial, commercial, and consumer uses where conventional plastic films would be undesirable or impractical.
