## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on QLC eSSD competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. QLC eSSDs are embedded solid-state drives that utilize four-layer cell flash memory technology. Each cell can store four bits of data, offering high storage density and low cost. They are primarily used in enterprise servers, data centers, and cloud computing applications where high capacity requirements and low read/write frequencies are present. In 2024, global QLC eSSD sales were approximately 120,000 units, with an average unit price of approximately \$450 and a typical single-line annual production capacity of approximately 20,000 units. Upstream companies are mainly concentrated in NAND flash memory wafer manufacturing, packaging and testing, and controller chips. Downstream companies include server manufacturers, cloud service providers, and data center operators. The gross profit margin for this type of product is approximately 30%. In the product cost structure, flash memory chips and controllers account for approximately 50%, packaging and testing for approximately 20%, firmware development and system integration for approximately 15%, quality verification and reliability testing for approximately 8%, and sales and management for approximately 7%. Products can be categorized by parameters into capacities of 15-30TB, 30-60TB, and others; mapping modes include 4KB granular mapping and 16K large granular mapping; read/write power consumption is categorized into less than 10W, 10-20W, and greater than 20W; application scenarios include enterprise IT, data centers, cloud computing, and other embedded fields.

The global QLC eSSD market size was estimated at USD 54.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.90% during the

forecast period.
