Abstracts

Quartz Tungsten Halogen (QTH) Lamps have high visible and near infrared output, with little ultraviolet making them great for use in Incandescent light sources. Quartz Tungsten Halogen (QTH) lamps are a common lighting solution composed of a quartz glass envelope, a tungsten filament, and halogen gas. Currently, the QTH lamps have a widespread application in areas such as stage lighting, photography, and medical equipment, thanks to their high brightness, stability, and relatively long lifespan, which appeal to consumers. As lighting technology continues to advance, QTH lamps are gradually being replaced by new technologies like LED lighting. However, they still hold a significant market share in specific industries.
