Abstracts

Propane is an organic compound with the chemical formula $\text{CH}_3\text{CH}_2\text{CH}_3$. This colorless, odorless gas is slightly soluble in water, but soluble in ethanol and ether. It has stable chemical properties and is not prone to chemical reactions, so it has excellent thermal properties and is cheap. With the increasing awareness of environmental protection and the continuous advancement of refrigeration technology, the demand for environmentally friendly refrigerants such as R290 (Propane) is expected to continue to grow. Currently, the refrigerant industry is in a period of transformation. As the environmental problems caused by fluorinated refrigerants such as Freon gradually emerge, more environmentally friendly and efficient refrigerants are gradually becoming mainstream.

The global R290 (Propane) market size was estimated at USD 128.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.40% during the forecast period.
