## Abstracts

VVVF (variable voltage variable frequency) inverter is a key device in rail transit power drive system, mainly used for power conversion and regulation to ensure the smooth operation and energy efficiency optimization of motors. With the acceleration of global urbanization and the continuous expansion of rail transit systems, the demand for VVVF inverters in the rail transit industry continues to grow, becoming a key device to promote rail transit technology upgrades and energy conservation and emission reduction. With the advancement of power electronics technology, digital control technology, communication technology, etc., the performance of VVVF inverters has been continuously improved, which can support more efficient and reliable rail transit operations. In addition, the intelligent and integrated development of inverters has promoted its further market penetration. The high technical threshold and complex design requirements of VVVF inverters make the initial investment relatively expensive. Despite the energy-saving advantages in the long run, the high procurement and installation costs are still challenges faced by many cities and projects. Subway and light rail: Urban rail transit is the main application area of VVVF inverters, mainly used for motor drive and system regulation. In 2023, it accounted for about 68%. VVVF inverters are also widely used in the EMU field, especially when speed, stability and energy efficiency are required. At present, the main manufacturers in the rail transit VVVF inverter market include: ABB, CRRC, Siemens, Alstom, Ingeteam, and Toshiba, etc. In 2023, the global three largest players hold a share more than 50% in terms of revenue. Overall, the rail transit VVVF inverter market will continue to grow in the next few years, and technological innovation, energy-saving and environmental protection needs, and the expansion of urban rail transit projects will drive the development of the market.

The global Railcar VVVF Inverter market size was estimated at USD 646.0 million in
