Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Railway Slab Track System competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global railway slab track system sales reached approximately 6,700 track-kilometers, with an average market price of 250 K USD per kilometer. This ballastless track technology fixes precast concrete slabs to roadbeds with elastic pads for stiffness adjustment.
