Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Rain Test Device competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of rain test device reached 28,000 units, with an average selling price of US\$56,000 per unit. Rain test device is a professional testing device used to test the waterproof performance and sealing reliability of products, widely used in industries such as automotive, electronics, electrical equipment, aerospace, and protective equipment. This equipment simulates natural rainfall by controlling the spray water pressure, flow rate, and nozzle angle to verify the waterproof rating of samples (e.g., IPX3-IPX9K). Upstream raw materials mainly include stainless steel plates, PVC pipes, nozzle assemblies, and electrical control systems, with representative suppliers including Baosteel, 3M, and Schneider Electric. Downstream customers mainly include OEMs and component manufacturers such as BYD, Bosch, Sony, and AVIC. Total production capacity exceeds 32,000 units, with the industry's gross profit margin maintained between 27% and 32%. In terms of downstream consumption, automotive electronics and vehicle testing account for approximately 48%, while waterproof electronics and military equipment account for approximately 35%. In terms of upstream raw materials, stainless steel and electronic control components account for 42% and 25% of the cost, respectively. In the future, with the increasing protection requirements for new energy vehicles, electric two-wheelers and consumer electronics, the rain testing equipment market will develop towards high-precision automation and programmable multi-mode.

The global Rain Test Device market size was estimated at USD 1569.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.40% during the

forecast period.
