Report Overview

Raspberry powder is prepared from raspberry, which is rich in ellagic acid. Ellagic acid belongs to the tannin family of phytonutrients and is considered to be an important component of antioxidant activity. Ellagic acid has become a potentially effective anti-cancer/anti-mutagenic compound. Ellagic acid may act as a scavenger to 'bind' carcinogenic chemicals, rendering them inactive. It may also inhibit the ability of other chemicals to cause bacterial mutations. In addition, ellagic acid in red raspberries may prevent carcinogens from binding to DNA and may reduce the incidence of cancer in cultured human cells exposed to carcinogens.
