Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Rattan Cane Webbing competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global rattan cane webbing production reached approximately 12 million square meters, with an average global market price of around US\$12 per square meter. Rattan webbing is a type of webbing or mesh material woven from natural rattan, paper rattan, or synthetic materials. It is usually supplied in roll form and is primarily used in furniture manufacturing, handicrafts, and gift baskets. It combines environmental friendliness, fashion, and vintage style, with good toughness and decorative properties. Width and length can be customized upon request. The upstream of the rattan cane weaving industry chain primarily involves the cultivation and collection of raw materials such as rattan and bamboo (e.g., natural rattan) and the production of chemical raw materials (e.g., polyethylene and polyvinyl chloride, used in synthetic materials). The midstream involves the weaving and manufacturing of rattan cane weaving, which involves artisans, family workshops, professional cooperatives, and large-scale factories, all using traditional manual or mechanical methods. Downstream, rattan cane weaving is widely used in furniture manufacturing (e.g., rattan chairs and hanging baskets), handicrafts, gift packaging, and home decor. It is sold to domestic and international markets through online and offline channels (including e-commerce platforms and cross-border trade). The development of the entire industry chain is closely linked to the inheritance of craftsmanship, market demand, design innovation, and the promotion of cross-border e-commerce.

The global Rattan Cane Webbing market size was estimated at USD 144.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.30%

during the forecast period.
