Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on RCIED Communication Jamming System competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global RCIED communication jamming system sales are estimated to reach approximately 22,000 units annually, with an average unit price of approximately \$55,000 per unit and an industry average gross profit margin of approximately 22%-30%. This device is a type of protection system used to counter wireless remotely controlled explosive devices (RCIEDs). It typically consists of a detection/RF situational awareness module, a jamming transmitter unit, an antenna subsystem, power and cooling management, mission software, and a command interface. Product forms include portable handheld, vehicle-mounted, and fixed-position models. General performance parameters focus on multi-signal recognition capability, number of concurrent jamming channels, system reliability, and electromagnetic compatibility. They are also required to meet shock, weather, and EMC certifications for military environments. A typical deployment configuration is a single system equipped with one to four antenna units and a control/recording terminal. The jamming frequency band covers 2 MHz-6 GHz, capable of concurrently jamming 12-24 channels, and typically has a continuous output power range of 100-800W. In terms of upstream and downstream, the upstream market relies on high-performance RF front-ends and transceiver modules, gain antenna units, high-reliability power supplies and cooling components, embedded processors, and anti-interference software. Downstream customers primarily include national militaries, defense contractors, and UN/peacekeeping and security contractors, often purchasing these components along with complete vehicles/post equipment or tactical communication networks. German defense electronics company Hensoldt AG has a mature product line and integration

capabilities in this market segment, with an estimated annual production capacity of approximately 2,500 units of RCIED jammers and tactical electronic countermeasures systems for global markets.

The global RCIED Communication Jamming System market size was estimated at USD 1210.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.20% during the forecast period.
