## Abstracts

Ready-to-use bioceramic sealer is an advanced material used in endodontic treatment, particularly for root canal filling. The sealer is designed to provide excellent sealing properties while promoting biocompatibility and bioactivity within the tooth structure. As people's awareness of oral health increases, patients' demand for high-quality, low-risk root canal treatment solutions is growing, prompting dentists to prefer ready-to-use bioceramic sealers with excellent biocompatibility and sealing properties. Such sealers not only simplify the operation process and reduce preparation time, but also provide reliable treatment options for complex cases due to their excellent stability. On the other hand, the aging population and the growing demand for dental restorations are also important factors in the expansion of the market.
