## Abstracts

An RV air conditioner, also known as an RV AC unit, is a cooling system designed specifically for recreational vehicles (RV). Unlike regular home air conditioners, RV air conditioners are much smaller in size and capacity, making them suitable for use in small spaces typical of mobile homes or campers. They are usually installed inside the vehicle's interior space or on top of the roof. These units work similarly to residential window air conditioners, pulling hot air from inside the RV, cooling it down, and releasing cold air back inside. Global key players of Recreational Vehicle (RV) Air Conditioner include Dometic, Airxcel, Truma, Webasto, ASA Electronics, etc. The top five players hold a share over 66%. North America is the largest market, and has a share about 55%, followed by Europe and Asia-Pacific with share 33% and 10%, separately. In term of product type, Top-mounted Type is the largest segment, occupied for a share of 71%. In term of application, Towable RVs has a share about 61 percent.

The global Recreational Vehicle (RV) Air Conditioner market size was estimated at USD 667.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.80% during the forecast period.
