## Abstracts

Rectangular Planar Magnetron is a magnetron with a rectangular structural design specifically designed for thin film deposition in the physical vapor deposition (PVD) process. Its rectangular arrangement design can form a uniform magnetic field distribution in a two-dimensional direction, effectively control the electron motion trajectory, improve the plasma density and deposition rate, and thus achieve efficient target sputtering. Rectangular magnetrons are widely used in applications requiring large surface uniform sputtering, such as flat panel displays (LCD, OLED), solar cells, architectural glass and other fields.

The global Rectangular Planar Magnetron market size was estimated at USD 329.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.90% during the forecast period.
